qktech | UiPath

2026 UiPath Partner Award Winner
International Agentic Testing Pioneer

Make Your Agentic AI Testing Enterprise-Ready.

Modernize agentic testing to automate faster, release with confidence and keep AI reliable at enterprise scale.

Testing is the bottleneck. Agents change the equation.

As AI agents plan, decide and act dynamically, testing must evolve from scripted automation to continuous, intelligent validation.

Traditional Testing · rule-based

- Follows predefined scripts
- Requires maintenance as applications change
- Scales through additional automation effort
- Humans manage exceptions and changes

Agentic Testing · goal-based

- Plans and executes against goals
- Adapts as applications evolve
- Scales through autonomous execution
- Humans govern, review and approve

WHAT UIPATH TEST CLOUD CUSTOMERS REPORT

50% less manual testing time

75% lower test maintenance

90% automation coverage

51% shorter development lifecycles

WHAT THE INDUSTRY ASKS OF TESTING TODAY

Faster Time To Market

Predictable Quality

Platform Reliability

Lifecycle Automation

Cost Optimisation

UiPath Test Cloud: Scale Agentic Testing Across the Enterprise.

Bring AI-powered test creation, autonomous execution and enterprise-grade governance together with UiPath Test Cloud to accelerate quality across the testing lifecycle.

Autopilot for Testers

AI that generates tests and data, writes automation, fixes errors and self-heals.

Agent Builder

Build custom testing agents for your own use cases.

Any UI or API

Web, mobile, desktop, Citrix, mainframe, SAP, Oracle. Thousands of tests in parallel.

Enterprise-Grade SAP Testing

SAP agents and Change Impact Analysis for ECC and S/4HANA.

Fits your Toolchain

Jira, Azure DevOps, Jenkins, GitLab, ServiceNow, SAP Solution Manager and more.

No-Code to Pro-Code

One platform for citizen testers, engineers and developers.

AI Trust Layer

Enterprise-Grade Security, Governance & AI Trust
Audit-ready execution, role-based access, PII masking and enterprise AI controls, governed centrally through the UiPath AI Trust Layer.

Test Manager | Studio | Orchestrator | Performance testing

Synthetic test data | Computer vision | Cloud and On-prem

UiPath brings the platform. QKTech makes it work for you.

One of the world's largest independent quality engineering providers, and UiPath's 2026 International Agentic Testing Pioneer Partner of the Year.

4,200+
quality engineering professionals

2,600+
QA and performance projects

25+
countries, 26 years

70+
banking customers

Everest Group®
Major Contender in Everest Group's 2026 PEAK Matrix® for Quality Engineering Services for AI

UiPath
2026 UiPath Agentic Testing Pioneer Partner of the Year

10,000+
customers running UiPath automation in production

1M+
certified UiPath professionals

Gartner®
Featured in Gartner's 2025 Market Guide for Quality Engineering Services.

OUR AI-ADOPTION ROADMAP

Phase 1 · Design

Requirements and test cases generated from BRDs, with domain context

Phase 2 · Execution

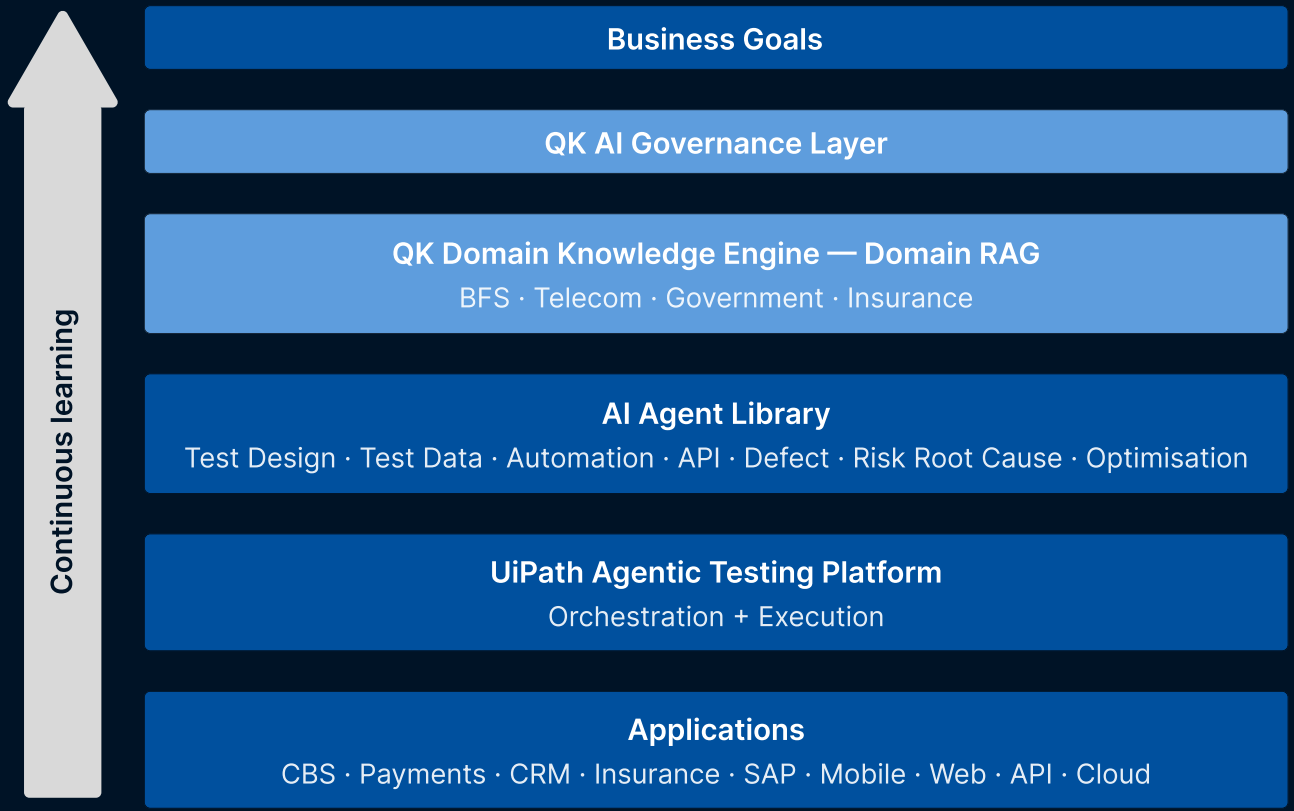

Scripts from natural language and autonomous exploration

Phase 3 · Insights

Defect clustering, predictive analytics, real-time dashboards

The Enterprise Agentic Testing Framework.

UiPath provides the agents and the platform. QKTech adds the domain knowledge and governance that turn them into business outcomes.

Feedback loop: Execution feedback · Production signals · Business KPIs → back to Business Goals

QK value assets that augment UiPath

- Domain-specific RAG
- Industry accelerators
- Enterprise prompt libraries
- AI governance framework
- AI quality scorecards
- Human-in-the-loop operating model
- Best practices
- Testing maturity model
- Adoption roadmap

QKTech + UiPath, already in production.

AI-led test automation delivered by QKTech on UiPath.

Largest bank in the UAE SME banking · 15+ year relationship	
Test cases automated	3,750
Executed through automation	11,240
Person-months saved	42.2
Velocity impact	+38%
AI-led	Execution, TDM, test generation, defect analysis

Top-10 bank in the UAE Banking applications · 10+ years · 47 apps	
Test cases automated	25,600
Executed through automation	210,370
Person-months saved	156
Velocity impact	+41%
AI-led	Execution, TDM, test generation, defect analysis

Top-10 insurer in India Life insurance · 5+ years	
Test cases automated	2,170
Executed through automation	8,120
Person-months saved	76
Velocity impact	+30%
Coverage	Web, API, mobile, CI/CT

31,500+
test cases automated across these three programmes

274
person-months of effort saved

30–41%
release velocity improvement

GETTING STARTED

From first pilot to testing factory, in **3 Steps.**

A proven path, with people in control at every stage.

Assess

Map your estate, test assets and release risks. Agree the business case and the first use case.

Pilot

Stand up UiPath Test Cloud on one application. Autopilot-generated, self-healing tests, measured against today's baseline.

Scale

Extend across applications and teams with a testing CoE, migration from legacy tools and governed agents in production.

BEYOND TESTING

Reliability for AI, not just for software.

As AI agents move into core business, QKTech extends quality engineering to the agents themselves, so what you ship stays dependable in front of customers and regulators.

Evaluate

Models and agents tested for accuracy, bias and safety before release

Observe

Behaviour monitored in production, with human-in-the-loop oversight

Govern

Traceability and evidence for regulated industries

qktech

Reliable automation. Reliable AI agents.

Let’s continue the conversation
